

Maths

Year 1

- ✓ Measuring height and length.
- ✓ Weight & Volume.
- ✓ Odd & even numbers.
- ✓ Estimating and grouping.
- ✓ Fractions.
- ✓ Consolidating basic number skills.

Year 2

- ✓ Rapid recall of 2, 5 & 10 times tables.
- ✓ Measuring height & length in cm and m.
- ✓ Measuring temperature.
- ✓ Capacity, volume & mass.
- ✓ Fractions.

English

We will be using our topic of 'Where in the world' to provide the children with meaningful contexts to write. The children will be writing an animal riddle, an animal fact file, a fictional narrative, a persuasive poster and a comparison between our own village and the mystery location. Whilst the children are doing this, they will apply the writing skills appropriate to their year group such as, capital letters, finger spaces, punctuation, conjunctions, adjectives and adverbs. Children will also be supported to use their phonic knowledge to spell words.

Science

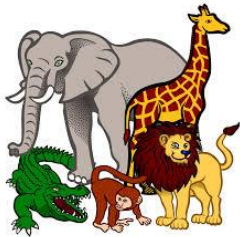

In science we will be looking at the structure and habitats of animals. We will discover what an animal needs to survive, grouping animals by diet such as herbivore, carnivore and omnivore and looking at a basic food chain.

'Where in the world?'

During this half term the children will be going on a virtual adventure. We will be researching a beautiful mystery location. The children will learn who lives in this country, the marvellous animals that inhabit, the local delicacies, seasonal changes and comparing this to our own village. From the pictures, can you guess which country this might be?

From this, we will then go on to create our own jewellery and masks and carry out food tasting.

This topic aims to provide the children with awe and excitement to help make our learning fun and engaging.

Geography

This term we will be continuing to use the internet, maps and atlases to help us learn the difference between human and physical features. We will also be going on a learning walk around Lingdale to discover what human and physical features are in our own locality. We will then be able to compare our own village to a country outside of the EU.

History

In history we will look at how the mystery country has changed over time and who was responsible for these changes.

Art & DT

We will use a range of materials and tools to create a sunset scene, make jewellery and a mask. First the children will develop their design before bringing it to life. We will also create a themed dish which is typically eaten in this country.

P.E.

This half term we will be focussing on the skills needed for invasion games and athletics.

Computing

We will be using the power of the Internet to research the country which we will be learning about.

P.S.H.E.

Discussing 'WaterAid' and understanding different cultures and traditions.
